Drug Effects ...

Every drug affects every person's mind and body differently.
Things that decide how a drug may affect you are:

- * **How much** you weigh
- * How **old** you are
- * How **fast** you take it
- * **How much** you take
- * How **strong** the drug is
- * What **other drugs** are in your body at the time
- * **How it gets into the body** (eating, smoking injecting, etc.)
- * Your general **physical condition**
- * What is **already in your stomach**
- * Your **mood** and your **emotions**
